# CATTLEYA DIVISIONS

These are not cull plants, they are merely plants that need repotting out of our regular stock of fine hybrids. Front divisions are of 2 or 3 bulbs and with reasonable care should grow well and bloom within a year. Back divisions are more clumpy and will usually take at least two years to bloom. All divisions will be checked for live eyes. Shipped bare root for you to pot. Potting supplies are listed on the back page of this catalogue. For descriptions of these orchids see the 1956 Orchid News.

Unknown Cattleya hybrids. Name tags have been lost. Name, color, season are not known, but are good cattleyas - priced low - a fine buy.

	Regular	Front	Back
C. Trianae x Lc. Tognitigalpa - Xmas and Winter	15.00	6.98	2.98
C. Gigas - prettiest species - May to July	8.50	2.98	1.49

### FINE NEW BOOK-

"ORCHIDS FOR HOME AND GARDEN" by T. A. FENNELL, JR. is the all-around best book on the subject for beginner and fancier alike. Contains "worlds" of valuable information on all phases of orchid growing from "starting your collection" through to "how to make corsages and arrangements with your orchid flowers" profusely illustrated with photos, color and drawings by the author. Easy to understand, plain and simple English with a few technical terms and it's fun to read! Available postpaid for only \$2.95.

BOTANICALS - NEW - VANDAS (OVER)

# LOVELY "JEWEL-TONE" ORCHIDS—TRUE GEMS AT BARGAIN PRICES!

The Vanda group is one of the most beautiful and fascinating of the whole orchid family. The strap leaved types are very easy to grow and can be raised right along with cattleyas. The plants themselves are graceful and decorative even when not in bloom. Best of all, Vandas bloom several times a year & larger plants often stay in bloom for months at a time. The flowers are very lovely - usually from 2-5" in diameter and carried in clusters from 8-20 per stem. The color combinations and color patterns of the flowers are the most beautiful and varied in the orchid family. Most Vanda flowers are colored with two or three lovely jewel tones in contrasting or blending colors that make delightful patterns of spots or tessellations over the background color. Just imagine combinations of topaz & ruby, Sapphire & turquoise, amber & carnelian, amethyst & opal, Coral & topaz, amethyst & sapphire, turquoise & amethyst all blooming in your window sill. Wouldn't you like some? All the plants are blooming size - most have bloomed already several times - the others will bloom this year. Most can be shipped in bud and we will do so whenever possible. These are strong and heavy plants at special introductory prices for the Sale. Prices will go up October 15. Send your order in right away!

Burgeffii - Sanderiana x Suavis - cream and pink - rust spots
